

Turbo charging your IT experience

By Iyanu Adelekan

Getting started with your IT experience

- Identify what you want to gain from the industrial training program.
- Turn these identified wants into company values.
- Identify companies that have these values.
- Apply! 🚀🚀

So I've gotten a place for IT. What next?

**WORK, WORK, WORK,
WORK**

WORK, WORK

But here's the thing about work...

- It's not easy at the beginning.
- You'll need to learn a lot in little time.
- It may take a while for your confidence in work to kick in.
- You may get frustrated.

With all these difficulties you are probably thinking...

- **I don't want.**

But here's the thing...

Pleasure in the job puts
perfection in the work.

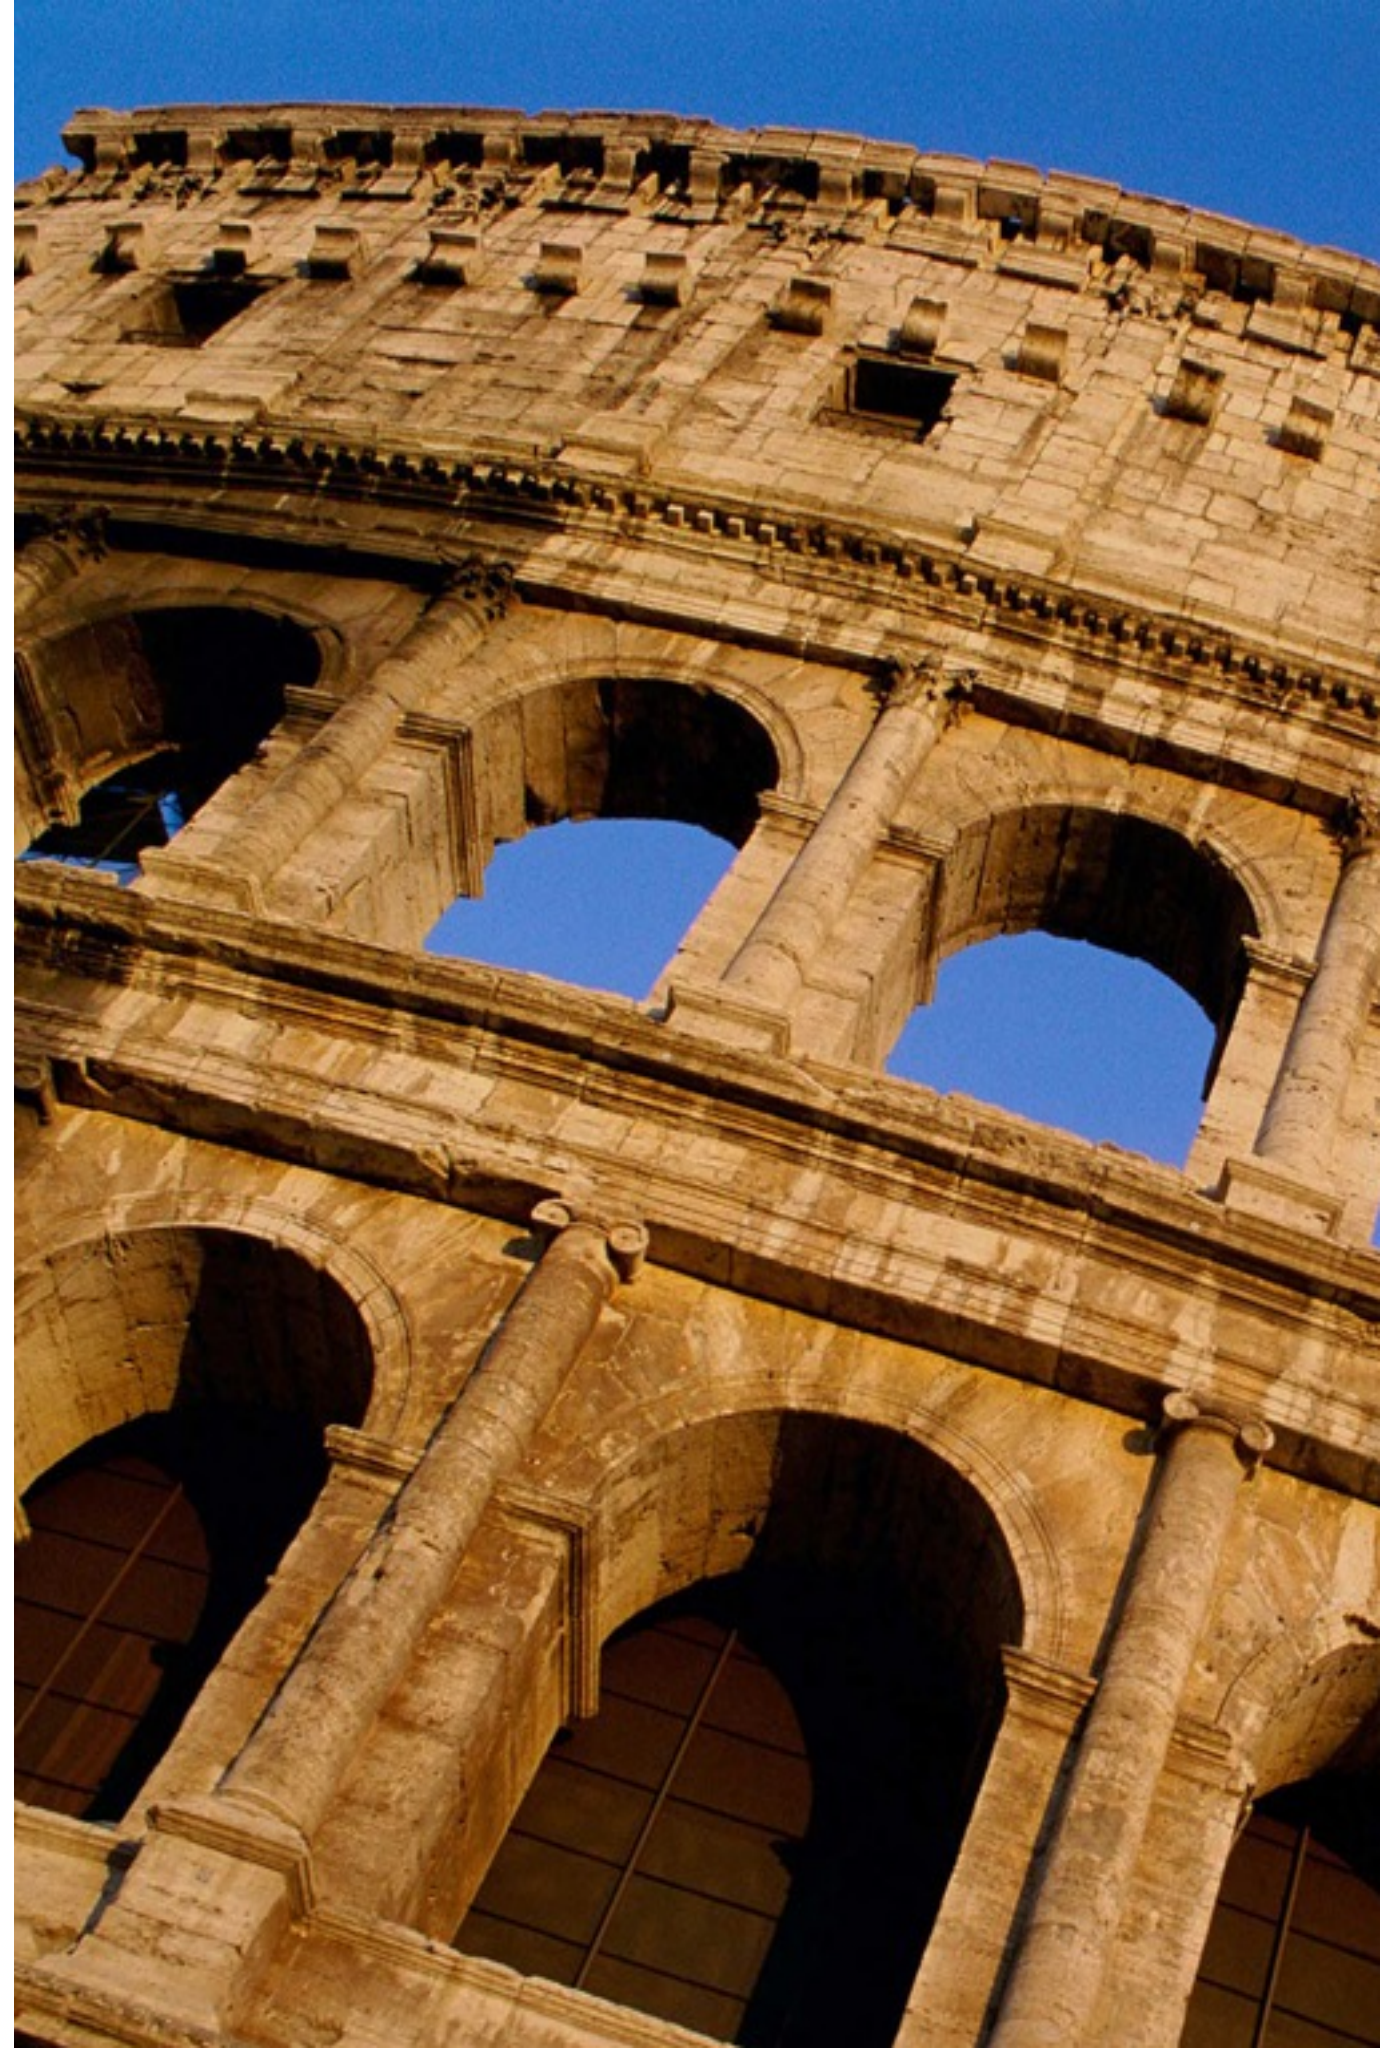

Aristotle

The 🗝️key🗝️ is to have fun with what you are doing!

- Wake up every morning with excitement about the day ahead.
- Ask your employer if you can work on something that interests you.
- Ask questions that interest you when you go on field work.
- Listen to music when coding!
- Watch a lot of youtube videos when stuck.

You'll be surprised:

- How much you'll thrive.
- The amount of work you'll get done.
- The number of people you'll impress.
- The level of happiness you'll achieve.

Always have fun in what you do and...

“Kid, you’ll move mountains.”

–Dr. Seuss

The end.
